About this Guide

The CLMaaS Getting Started Guide will help you get started with deploying AppViewX's CERT+ Certificate Lifecycle Management solution as a service.

Audience

This guide is intended for AppViewX's customers looking for a starting point/quick reference guide for the CLMaaS deployment.

Text Conventions

The following text conventions are used in this document:

Convention	Description
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>codeblock</code>	Indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Chapter 1: Scope of this Document

- [Scope of this Document](#)

Scope of this Document

This document gives you a brief introduction to AppViewX's latest offering—deploying the CERT+ Certificate Lifecycle Management Software as a Service (CLMaaS)—and a list of important links to help you get started.

Chapter 2: The AppViewX CLMaaS

- The AppViewX CLMaaS

The AppViewX CLMaaS

As an intriguing alternative to its traditional on-prem model, AppViewX is now offering a cloud-based Certificate Lifecycle Management service—CLMaaS (Certificate Lifecycle Management as a Service)—that addresses all vulnerabilities in accessing a customer's network.

Note: Version 21.1 will focus on deploying AppViewX's flagship product, CERT+, as a CLMaaS. Along with the additional features enabled for the CLMaaS deployment, CERT+ continues to support its existing on-prem features. For details, click here refer to the CERT+ CLMaaS User Guide.

To enable a SaaS-based deployment, and to address all vulnerabilities in accessing the customers' network, AppViewX introduces the AppViewX Cloud Connector (CC) Connectivity Service that serves as a channel for enterprise connectivity. The AppViewX Cloud Connector is a stateless component that facilitates communication between the AppViewX cloud and the enterprise backend network and enterprise system without requiring complex network or infrastructure configuration.

Chapter 3: Important Links
