# Preface

## Revision History

Revision	Description	Date
1.0	AppViewX v2022.1.0 FP5 (On-prem) Release Notes.	May 2025

## About this Guide

This release, version 2022.1.0 FP5, does not include any updates related to new features, enhancements, and software limitations. The focus of this release is solely on the component upgrades and security fixes. These updates ensure the system remains secure and up-to-date without introducing additional functionality or changes to the existing software.

## Intended Audience

- Customers using AppViewX v2022.1.0 FP5.

## Third-Party Software Acknowledgments

This section serves as a placeholder to document the third-party components referenced in this guide, along with their associated trademark information.

## Text Conventions

The following text conventions are used in this document:

Convention	Description
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>codeblock</code>	Indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

# Chapter 1: Feature Update

This release, version 2022.1.0 FP5, does not include any updates related to new features, enhancements, and software limitations. The focus of this release is solely on the component upgrades and security fixes. These updates ensure the system remains secure and up-to-date without introducing additional functionality or changes to the existing software.

## Note:

- For all module's technical documentation, refer to [v2022.1.0\\_FP3](#).
- The details of all third-party and Kubernetes components upgraded as a part of this release is referenced in the security advisory documentation.
