Revision History

Revision	Description	Date
1.0	AppViewX_v2022.1.0 FP1 2372 Release Notes.	January 2024

About this Guide

This release document accompanies AppViewX v2023.1.0 FP1 2372 release which contains all the listed feature requests, enhancements and bug fixes that are regressed and packaged.

Text Conventions

The following text conventions are used in this document:

Convention	Description
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>codeblock</code>	Indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Chapter 1: Feature Request

This section lists the feature request in AppViewX v2023.1.0 FP1 2372 for the SaaS module.

Platform

The following feature requests are included in AppViewX Platform.

Case/ Ticket Number	Description
ARCH-8264	A fairness algorithm is implemented in the Queue service to address the Noisy Neighbor issue. This ensures that one tenant can not monopolize the service entirely, preventing negative impacts on the performance and user experience of other tenants.

Chapter 2: Enhancements

This section lists the enhancements in AppViewX v2023.1.0 FP1 2372 for the SaaS module.

CERT+

The following enhancements are included in AppViewX CERT+.

Case/Ticket Number	Description
SWAT-19848	An enhancement is implemented to establish the correct permission levels for keys in the Apache push and bind operation.
SWAT-21774	This feature will allow the customer to discover and manage certificates on Linux-based devices with the bracketed paste mode shell configuration enabled by default.
SWAT-22614	This feature will provide a solution to disable the bracketed paste mode configuration at the session level if it is enabled on a specific Linux OS.

Chapter 3: Bug Fixes

This section lists the fixed bugs in AppViewX v2023.1.0 FP1 2372 for the SaaS module.

CERT+

The following fixed bugs are included in AppViewX CERT+.

Case/Ticket Number	Description
SWAT-22455	The issue with Panorama push and bind operations failing is resolved.
SWAT-22619	The issue of SAN values not populating for Sectigo CA is resolved.
SWAT-22203	The issue of rejecting client provided CSRs during certificate creation issue is resolved.
CERT-54841	The issue of self-signed certificates being categorized as root is resolved.
SWAT-21125	The issue with FortiGate push and binding certificates to system settings is resolved by enabling the bind option in System settings.

Chapter 4: Known Limitations

This section contains the known limitations in AppViewX v2023.1.0 FP1 2372 for the CERT+ module.

There is no limitation in this release.
