Revision	Description	Date
1.0	AppViewX v2024.2.3.1 (SaaS) Release Notes	Aug 2025

About this Guide

The AppViewX 2024.2.3.1 (SaaS) release notes includes new features, enhancements, bug fixes, known issues, and known limitations in the software.

Intended Audience

Customers onboarding AppViewX v2024.2.3.1.

Third-Party Software Acknowledgments

This section serves as a placeholder to document the third-party components referenced in this guide, along with their associated trademark information.

Text Conventions

The following text conventions are used in this document:

Convention	Description
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>codeblock</code>	Indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Chapter 1: New Features

There are no new features in this release.

Chapter 2: Enhancements

There are no enhancements in this release.

Chapter 3: Bug Fixes

This section describes the bug fixes in this release.

CERT+

The logic for validating certificate filenames for Azure application gateway has been updated to align with the new Azure naming convention. Filenames must now:

- Begin with a letter or number
- End with a letter, number, or underscore (_)
- May contain only letters, numbers, underscores (_), dots (.), or hyphens (-)

Additionally, the certificate filenames for Azure App Services now support the use of the dot (.) character.

Chapter 4: Known Issues

There are no known issues in this release.

Chapter 5: Known Limitations

There are no known limitations in this release.
