# Preface

## Revision History

Revision	Description	Date
1.0	AppViewX v2024.2.5.0 (On-Prem) Release Notes	Sep 2025

## About this Guide

This release notes describe new features, enhancements, known and fixed issues, and known limitations in the software.

## Intended Audience

- Customers onboarding AppViewX v2024.2.5.0.

## Third-Party Software Acknowledgments

This section serves as a placeholder to document the third-party components referenced in this guide, along with their associated trademark information.

## Text Conventions

The following text conventions are used in this document:

Convention	Description
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>codeblock</code>	Indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

# Chapter 1: New Features

This section describes the new feature in this release.

## Platform

A new ACF (Access Control Flag) titled **Show Output** has been introduced under **Role > ACF > Automation > Service Requests > User Preference**.

- When enabled, the API `getvwworkorderInfo` (`visualworkflow-get-request-current-task-details`) returns the workflow output details.
- When disabled, the workflow output in the same API response is omitted (empty).
- By default, this flag is disabled for all users except administrators.

# Chapter 2: Enhancements

There are no enhancements in this release.

# Chapter 3: Bug Fixes

There are no bug fixes in this release.

# Chapter 4: Known Issues

There are no known issues in this release.

# Chapter 5: Known Limitations

There are no known limitations in software in this release.
