Preface

Revision History

Revision	Description	Date
1.0	AppViewX v2024.2.6.0 (On-Prem) Release Notes	Oct 2025

About this Guide

These release notes describe new features, enhancements, known and fixed issues, and known limitations in the software.

Intended Audience

- Customers onboarding AppViewX v2024.2.6.0.

Third-Party Software Acknowledgments

This section serves as a placeholder to document the third-party components referenced in this guide, along with their associated trademark information.

Text Conventions

The following text conventions are used in this document:

Convention	Description
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>codeblock</code>	Indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Chapter 1: New Features

This section describes the new features in this release.

Platform

Dynamic APIs allow new API endpoints to be created and exposed purely through configuration, without implementing a plugin or redeploying code. They can **invoke existing APIs or submit workflow requests**, with optional transformation logic applied to incoming requests.

Chapter 2: Enhancements

There are no enhancements in this release.

Chapter 3: Bug Fixes

This section describes the bug fixes in this release.

Automation

In the user input form when multiple columns were added to the tabular field, the column widths would shrink making the values difficult for users to read. This issue has been resolved.

Chapter 4: Known Issues

There are no known issues in this release.

Chapter 5: Known Limitations

There are no known limitations in this release.
